Coleman Honors Valued Citizen on His Departure

ALEX. M. MORRISON who retires from 33 years of business life in Coleman to live at the Coast.

Coleman bade farewell to a loyal and highly respected citizen and his wife last Friday, in the persons of Mr. and Mrs. Alex. M. Morrison. Presentations were made by the business men of a gold watch, and of a life-membership in Summit Lodge, A. F. & A. M., to Mr. Morrison, he being a past master of the lodge and a past district deputy grand master of Masonic District No. 8.

It was in 1905 that Mr. Morrison staked his future on the young village of Coleman. He saw it incorporated into a town, and for some years served as mayor. In many lines of community activities he took a prominent part, and his counsel and advice was sought by people of all nationalities, who came here to work in the mines.

In politics he was an ardent Liberal, and was the candidate for the provincial legislature in 1921. During troublous times he was always a steady influence, for the course of events does not run quite as smoothly in a mining town as in the more staid agricultural settlements.

What About The Crows Nest Pass?

Premier Aberhart's statement that more money has been spent on highways than received from license fees and gasoline tax is not accepted with good grace in this district. Despite repeated promises that surfacing would be done on the sections between the Pass towns, nothing whatever has been done to eliminate the hazardous dust conditions. Social Credit supporters in this district should certainly get some return for helping the premier to retain office, and for the taxes paid to the government.

20th Anniversary Celebration, Republic of Czecho-Slovakia

Coleman Officers Propose Organizing Fitting Ceremonies. To be Held on Labor Day.

Following the Great War, the republic of Czecho-Slovakia was formed, and independence restored to the stalwart people who for over a century had suffered at various times from the ravages of war.

There are many people from that country resident in the Crows' Nest Pass towns from Bellevue to Cranbrook, and there will be a gathering here on Labor Day, Monday, September 5, which is a national holiday.

Local officers of the First Slovak Benefit Society are Steve Siska, president; J. Lipnick, vice-president; Louis Buhnick, secretary, and Steve Lecky, treasurer.

LOCAL BIRDS TO COMPETE IN 200-MILE RACE

Pattinson Cup and Young Birds' Championship Arouse keen interest; Race From Wetaskiwin.

The fourth young birds' race was flown from Red Deer, Alberta, 196 miles along, on Saturday, August 20. Liberated at 7 a.m. the birds made good time, being clocked in at Coleman as follows:

1st, A. Zar, 12:14:55.

2nd, T. Cornil, 12:15:23.

3rd, W. Pryde, 12:15:41.

Nine members completed.

Next race will be for the Pattinson cup and young birds' championship, and will be flown from Wetaskiwin, Alberta, 236 miles along. Birds for race to be at C.P.R. depot 12 noon, Friday, August 26.

On Sunday, August 28, the Coleman club will compete with other southern Alberta clubs in a 200-mile race. These birds will be shipped on Saturday, August 27.

—F. Beddington.

EXTENSIVE AUTO TOUR

Mr. and Mrs. Fred Stokes, of Cadomin, were here this week at the home of their daughter, Mrs. D. Duffield, junior, and Mr. Duffield. They have been on a motor tour to Atlantic City, N.J., back across the States to Seattle, then to Coleman via Spokane, and on reaching home will have completed a tour of over 9,000 miles. They are former Coleman residents, Mr. Stokes having been employed as engineer at International mine, and he with Mrs. Stokes homesteaded east of here, on the place known as the Stokes' ranch.

BODY FORMER COLEMAN MAN FOUND IN WELL

Mundare, Alta., Aug. 17.—William Makowchuk, 37, Ukrainian miner, who formerly lived in Coleman, was found dead Tuesday, drowned at the bottom of a 42-foot well. He disappeared Monday night and Tuesday Royal Canadian Mounted Police, conducting a search for him, found the casting of an old well broken. The body was recovered from twenty feet of water with grappling hooks.

Makowchuk leaves his widow and three children.

Sergeant B. C. Jakeman, of Cardston detachment of the R.C.M.P., is taking the place of Sergeant J. A. Cawsey at Blairmore during the latter's holidays at Vancouver.

Makes Newspaper Cuts From Photographs

The above picture may cause the average reader to wonder what it represents. It is the first cut from newspaper work produced by Evan Gushul, of Gushul's Photo Studio, Blairmore, and is an evidence of enterprise on the part of this firm in installing the most up-to-date equipment available for making newspaper cuts, especially of local interest.

It means that The Journal will be served by pictures as quickly as the daily newspapers, and which will add to the general interest. To make cuts from photographs requires considerable technical skill and experience, and this first picture is exceptionally good, especially when it is considered that Mr. Gushul had no tuition except that gained from instructions received with the machine.

Council Deliberates On Knotty Problem—Horseshoe Pitching Causes Controversy

Proposal to Lay Out Open Air Skating Rink For Young People in Flumerfelt Park is Discussed

A matter requiring the wisdom of council was considered at the council meeting on Tuesday evening. Two letters were received regarding the horseshoe grounds at present located on Fourth street between the Vincent and Sharp residences. A letter from Edward Woods, on behalf of the horseshoe pitchers, and containing a list of 49 names, asking that the council grant them this ground to promote this outdoor sport. The second letter was one from Mrs. Sharp, and was a complaint against the continual noise made by the players. She stated that games were in progress each evening until dark, and on Sundays and idle days the games were in progress from morning till night. She asked that the council prohibit the playing of horseshoes in that particular street.

The council were divided on the point, one councillor stating that if the noise was injurious to Mrs. Sharp's health, the men should be asked to move. A motion, that the players be given the ground, failed to get support. Councillor White then stated if the matter was tabled until the next meeting he would interview Mr. and Mrs. Sharp with the suggestion they trade houses with him, the difference in value, between the houses to be settled in a cash payment. The council tabled the matter.

John Salvador, secretary of a group interested in promoting an open-air skating rink, in a letter petitioned the council to grant them some ground back of the tennis courts. The council were much in favor of the proposal and are willing to grant them any ground required, providing it does not interfere with the two lower courts at present used by the tennis club. It was decided to arrange a meeting, asking the school board and Mr. Salvador and his committee to meet the council and thoroughly discuss the proposal.

A letter from the Alberta Youth Movement organizer was received by the council. Two young people, a Mr. Carlson, of Bellevue, and Miss Isabel McDonald, of Coleman, are at present at Edmonton receiving a three-week course free in youth training. The letter was filed.

Application for old-age pension by H. W. Clark was approved.

A letter from Edmonton was received, stating that the application of Mr. and Mrs. Wm. Pryde for old-age pensions could not be considered since neither qualified under the twenty years residence in Canada clause.

A committee of two was appointed to try and secure a pension for Joe Kwasnie, who has lost his sight.

A letter from Mrs. Hart was dealt with and action taken to grant her request.

The interim report of the Community hall was read and taxes for 1938 waived.

Constable Antle was granted two weeks vacation.

The question of keeping cows in West Coleman was tabled till the next meeting.

The by-law re parking of trucks on Main street was tabled until a later meeting, a committee being appointed to study all phases of the local traffic problem.

A Calgary photographer was granted a six months' license, to cost \$12.50. Accounts examined and passed included: Relief \$25.29, Dept. Public Health \$36, International Coal & Coke Co. \$2.50, Coleman Community Hall \$8.75, King's Printer \$25, Provincial Treasurer \$16.25, Hunter's Bakery \$7.13, Coleman Light & Water Co. \$185.20, Joe Michalsky \$10.00, Alber-

SPECIAL EDITION WILL RECORD IN STRIKING MANNER IMPORTANCE OF THIS AREA IN INDUSTRIAL LIFE OF ALBERTA—BOARDS OF TRADE AND BUSINESS HOUSES CO-OPERATE WITH THE JOURNAL IN PRESENTING RECORD OF 30 YEARS OF GENERAL DEVELOPMENT

There's an old maxim to the effect that the wheel that squeaks most gets the most grease. Therefore, The Journal will sing the praises of this important industrial area by publishing a monster edition during the coming month which will make it known to the whole wide world that the Crows' Nest Pass is no mean place in the industrial life of this great province in this Dominion of Canada.

"Coal is King" in the Crows' Nest Pass, for it furnishes employment to approximately 2500 mine workers in the Alberta section, without taking in those employed in the neighboring towns of Fernie and Michel. It means much to Alberta, and too little of its importance is known, not only in this province, but throughout Canada.

It is from the production of coal that all other business institutions in the Crows' Nest Pass thrive, besides the benefits that accrue to the cities of the province. Therefore, The Journal considers the time is appropriate to give striking publicity to 30 years of industrial development by preparing an edition which will reflect the activities of not only the coal industry, but of those engaged in the various other business activities and the professional life, as well as fraternal, social and religious organizations.

By the publication of such edition, much valuable publicity should accrue to all engaged in business in the Pass towns. Mr. John Larsen and Mr. Charles Howard, as representatives of The Journal, will solicit advertising, and prepare publicity material for the issue, and the publisher bespeaks for them a courteous hearing.

Cranbrook to Celebrate 40th Anniversary of Arrival of Railroad

Employees Use Pressure To Hold Business

Forbes Magazine

In the battle between railroads, trucks and airlines for more passenger and freight traffic, the Baltimore & Ohio Railroad recently started a flank attack that left competitors gasping.

For B. & O. employees at DuBois, Pa., (population 11,000) persuaded nearly 100 local business men to subscribe to a full-page advertisement in the city's newspaper urging the public to "Ship and travel by rail."

More than that, they even induced local merchants to enclose printed slips with all purchase orders to distant points:

This Order Must POSITIVELY BE SHIPPED via BALTIMORE & OHIO R. R. (Truck Shipments Not Accepted)

Behind this aggressive campaign to get more business was the reasoning of B. & O. employees that the community should support every effort the company makes to get new business.

For 1200 B. & O. employees live in and near DuBois, and the road's shops pay local taxes plus annual wages of \$2,000,000.

Editorial Note: The above needs no further comment in using every effort to retain coal business for the Crows' Nest Pass towns. Coal furnishes the payroll to mine workers; it furnishes business to every business and professional man and woman; from the coal industry our teachers are paid as well as all civic employees. The coal industry is the life of the Pass towns.

The Journal, through its industrial edition, is endeavoring to make it known what the coal industry means to the Pass and Alberta, and copies will be sent out to all parts of Canada. For that reason it should receive the support of councils and boards of trade in all Pass towns.

TRAVEL BARGAINS TO COAST ANNOUNCED BY C.P.R.

Those who are planning early Fall vacations will welcome the announcement of bargain fares to the Pacific coast by Mr. W. L. Taylor, Canadian Pacific ticket agent.

Tickets will be on sale September 3 to 11, inclusive, with thirty days return limit, and will permit a stopover at Calgary, Nelson and stations west, which will allow passengers an opportunity of seeing the Rockies in their autumn splendor.

A feature of these fares will be the privilege of tourist or standard sleeper at slightly higher rates and usual berth charge. A special low fare good in coaches will also be available.

The early fall is a particularly good time to visit the coast, and a delightful period in which to travel. Those contemplating a trip at this time should get in touch with Mr. Taylor and obtain full particulars.

"If thou canst believe, all things are possible to him that believeth." —Mark 9:23.

The Grasshopper Menace

Coming from a man of his knowledge and practical experience of agricultural practices and pursuits the recent published statement of Hon. W. R. Motherwell in Regina to the general effect that man can do comparatively little to cope with grasshopper infestations and that in this respect Nature must be allowed to deal with such insect visitations in her own way and in her own good time must have caused some disquietude among farmers of the prairie provinces.

Among other things, the viewpoint expressed by the former Federal Minister of Agriculture, is destined to raise the question in the minds of a good many whether the large sums which have been spent in recent years in poison bait campaigns has been money wasted, and in the second place is likely to discourage further efforts to control the pests in future years.

On the question of the degree of efficacy of control measures there are admittedly differences of opinion, not only among the farmers themselves but between experts and technicians who advise on such matters.

There is plenty of evidence, scientific and practical, however, that in the past few years, millions of grasshoppers have been killed as the result of application of control measures, both cultural and by the use of poison bait, and particularly where measures have been taken at the precisely appropriate time and conducted in strict accordance with the recommendations of the authorities. It is only reasonable to assume, no matter how severe the infestation of the ensuing crop and the extent of the damage that was done to it, that the loss would have been greater had these measures not been taken, for dead grasshoppers cannot reproduce.

Looses Are Serious

The problem may not appear so momentous just now to the people of Alberta and Manitoba as it does to thousands of farmers in a large area of Saskatchewan who have recently seen fine crops partially, and in some cases almost entirely, ruined by an influx of great hordes of ravenous grasshoppers on the eve of harvest.

It is not necessary to dwell on the anguish caused to farmers who had a good crop almost within their grasp after years of impoverishment, by these overnight invasions of millions of insect pests, but it might not be amiss to point out that farmers in Manitoba and Alberta have had sufficient experience with grasshoppers within the past decade, to realize that perils lurk for them, as well as for their Saskatchewan colleagues, next year if a Saskatchewan is to be a nursery for a 1939 crop of "hoppers", perhaps of even greater magnitude.

The sudden blow dealt to a large number of Saskatchewan farmers this fall may be repeated next year and may be the lot of farmers in either or both of the sister prairie provinces in the autumn or late summer of 1939, if nothing can be done by human agency to mitigate or prevent it.

Early this spring a provincial government map was published demonstrating that severe infestation from Saskatchewan bred "hoppers" was to be expected in that province in only two or three relatively small areas, based on an egg count conducted by agricultural authorities. If their diagnosis was correct the invasion of Saskatchewan fields this fall must have had its origin outside the province and this appears to be borne out by evidence of observers on both sides of the international boundary. In other words, there is some reason to believe that some of the loss, perhaps the major part of it, to Saskatchewan farmers occasioned by grasshoppers this fall had its origin in some of the neighboring States.

An International Problem

If grasshoppers can travel the considerable distances in the comparatively short time indicated by this evidence the problem is not confined to the district or the province, but becomes one of extra-provincial and international scope, and if anything can be done by human agency to curtail the peril it can only be effectively done by joint action of the authorities and all the people within the danger zone irrespective of political boundary lines.

The situation at least preargues the advisability of a round table conference between the authorities, technical experts and practical farmer-leaders of the Canadian provinces and American States subject to this danger with the object of devising control measures on as wide a scale as may be necessary, if it should be decided that control measures can produce results within the range of economic feasibility.

If such a conference agrees that effective control measures can be taken, a co-ordinated educational program should be mapped out and undertaken among the farmers of the entire territory affected and consideration should also be given to the advisability of passing legislation to make the approved measures effective in all the states and provinces subject to infestation.

Platypus On Stamp

Australian Government Determined To Prove Mammal Is Rare

The Australian Commonwealth postal department will issue a new series of nine-penny stamps Sept. 1. They will bear a reproduction of a platypus, and their color will be amber gray.

The postmaster-general's department feels that many people abroad are still sceptical about the existence of this amphibious fur-bearing mammal, which has a duck-like bill, web feet, lays eggs and hibernates in a burrow.

Pineapples from France are being cultivated in hothouses on the Black Sea coast of Russia.

Will Make Survey

Dominion Bureau of Statistics Wants Figures On Living Expenses
The first Dominion-wide survey of nutrition and family living expenditures will begin shortly. The survey, instituted by Hon. W. D. Fisher, minister of trade and commerce, will be carried out by the Dominion bureau of statistics.

The branch hopes to obtain records of the manner in which family income is spent in urban areas, including a high proportion of the country's wage-earning population. A statement issued under Mr. Fisher's authority said:

"Besides furnishing a basis of comparing living standards in Canada with those in many other countries for which surveys recently have been made, these records will provide invaluable information concerning conditions of nutrition.

"They will also make it possible to measure changes in living costs much more accurately and to estimate differences in family budgets according to regional areas. Such data form a necessary basis for adjustments in wage scales of industrial workers.

"The survey is to be made in September and October and because of the difficulties in obtaining such data on a comprehensive scale, only a sample of wage-earning families will be canvassed.

"Those who contribute careful expense accounts would contribute materially to the success of the survey and at the same time perform service to their community by indicating to the Dominion bureau of statistics, Ottawa, their willingness to co-operate.

"The cities to be included in the survey are Charlottetown, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. These centres have been chosen after examining the most recent census records carefully to assure a representative selection."

China Outbys Japan

Has Been Heaviest Purchaser Of War Materials In Canada

Spokesmen for the Department of External Affairs, in close touch with the Sino-Japanese war, have said that "a cook and bull story" report from China that Japan intended making large purchases of munitions in Canada.

"Canadian manufacturers have no facilities for the immediate production of munitions on a large scale," it was stated. "And it is doubtful whether Japan has any surplus gold or credits to be spent on foreign purchases."

To date no country has restricted the shipment of arms to either China or Japan and Canada will not likely do so until one of the major powers declares an embargo.

Since the war started, China has been the heaviest purchaser of war materials in Canada. The Chinese Government has bought a number of planes here for training purposes while Japan has purchased only one plane, ordered before the war.

There have been shipments of lead, zinc, copper and nickel to both countries, but the bulk of the shipments have gone to China.

His First Assignment

Reporter Took No Chances On Truth Of His Story

The young reporter who had just joined the staff of the local paper received an awful warning on the dangers and appalling consequences of making ill-founded statements in print. With this fresh in his mind he set off on his first job to report the sale of work which was being held in a nearby village.

Pale but triumphant he returned, and handed his first copy to the editor. "The bazaar," it read, "was opened (so it is said) by Mrs. Brown, alleged to be the wife of Councillor Brown, commonly supposed to be a more or less highly-esteemed tradesman of this town. She was dressed in what some would describe as fashionable attire, and was supported on the platform by the social-climber and other reputed ladies and gentlemen."

How To Get A Post Office

Disney, boom town of 1,000 on the Grand River damsite in Oklahoma, wanted a post office, so civic-minded residents wrote thousands of letters in answer to newspaper and magazine advertisements. Soon the mail carrier was staggering under piles of "literature," and Disney got a post office.

The cotton boll weevil came to the United States from Mexico.

A large airplane factory will be established in Helsinki, Manchuria.

Dwarf Shetland ponies are now popular as pets in England.

Most People Are Blind

Have Only Vaguest Idea Of What Things Look Like

Eric Newton, in The London Listener, says the scientist is given the credit for being a specialist in truth, but how often is the artist given the credit for being a specialist in beauty? For the most part, I am afraid, not the modern artist, at any rate. We all feel quite confident of two things. We think that we know what things look like; and we think we know what is beautiful and what is ugly when we see it.

In actual fact most of us have only the vaguest idea of what things look like; and our ideas of beauty are entirely dependent on what is presented to us by artists and how it is presented. Let us take the question of truth to appearances first. When I said most of us don't know what things look like, I meant what I said quite literally.

Of course we can recognize our friends' faces, and we can even tell whether they are pleased or angry from the slightest alteration in the set of their features. We can all use our eyes when there is any advantage to be gained from doing so. A cook knows exactly the color of toast when it is properly toasted. A woman can remember a precise shade of blue if she has to buy a piece of ribbon to match her dress. But when there is no advantage to be gained from it, most of us are blind.

Do we know the color of the shadow of a cloud on a distant hillside? Or the difference in tone between the red of a tiled roof and the red of a sunset? No, we don't know any of these things until the artist shows them to us. It was Turner who taught us how to look at sunset. Constable who showed us the sparkle of a tree's foliage. Van Gogh discovered the rich yellow of corn in sunlight. Cezanne discovered the way one plane intersects with another.

They taught us how to look at nature we simply didn't know what certain aspects of nature were like. So let us not be too sure of ourselves when we tell an artist that he is untrue to nature.

Ships Of The Future

Streamlined And Air-Conditioned Will Have Glass-Enclosed Decks

A French authority recently stated that the threat of trans-ocean air travel makes it necessary to tackle shipbuilding from a new angle. The user in space but it can offer its passengers comfort, safety, cuisine, freedom, amusement and rest to a far greater degree. These things must, therefore, be exploited to the full, states W. J. Bassett-Lawie, in the P.L.A. monthly.

Streamlining is an essential part of the design of the ship of the future. The decks are glass-enclosed to decrease wind resistance as well as to protect passengers from the breath of the sea. Indeed, it is possible that only conditioned air will be able to go throughout the ship except in the outside cabins. Funnels are the greatest difficulty in preventing perfect streamlining, and in this ship the uptakes are run into horizontal tunnels, and, with parallel or adjoining tunnels, help to ventilate the entire ship.

Peculiar Timber

A kind of hardwood timber, found only in North Queensland, Australia, will burn as well when it's wet as when it's dry. In fact, when a wet stick is ignited, the water is expelled as steam from the stick's end.

The annual estimate by the Department of State shows that on January 1 last nearly 350,000 American citizens were living abroad, more than half of this number in Canada.

Internal pressure of the earth, near the centre of the globe, is said to be 45,000,000 pounds to the square inch.

The phororhacos, an extinct Patagonian bird, had a skull as large as that of a horse.

The Business Outlook

Usual Forces Which Make For Improvement Are At Hand

There is a good dose of poison for pessimists in the current business outlook, states Canadian Business.

Most of the usual forces making for improvement in business are at hand. An invigorating expansion in consumer buying can be expected. Wants deferred from the last depression have yet to be satisfied. Inventories have been cut below normal. There is no over-expansion. Commodity prices are tending upwards. The first well distributed normal wheat crop since 1932 is expected.

Construction is still a powerful latent factor in the business picture and is now being given a helping hand by the Government. Armament and aircraft orders are becoming facts. New investment possibilities are becoming available. Our important southern neighbor is experiencing a sharp turn for the better.

In other words, a normal revival seems in process and may well be stimulated by special influences.

Pictureque Branding

Private Or Caste Marks Used On Island Of Ceylon

The Island of Ceylon does a considerable trade in hides and skins, but almost all the cattle and buffalo skins are damaged by excessive branding. The kinds of branding in vogue are private or caste marks and the marks made by Vederals (Ceylonese cattle physicians) for the prevention or cure of disease. Oftentimes the Vederals are artists in their work and brand elaborate designs on various parts of the body according to the disease from which the animal is believed to be suffering. In addition to all those marks, it is also a common practice to brand cattle with a certain design when they are castrated. Many hides are rendered completely useless, as extensively are they branded. Up to 1936, there was still another brand in use—the communal mark—but it was abolished by law in that year. At present there is no restriction to private branding.

SELECTED RECIPES

CUCUMBER PINEAPPLE SALAD

1 package Lemon Jell-O
1 pint hot water
1 sliced canned pineapple, cut in wedges
1 cup seeded cucumber
Dissolve Jell-O in hot water. Arrange pineapple wedges in bottom of mold. Pour on Jell-O, being careful not to disarrange pineapple. Add cucumber. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 6.

HORSE-RADISH RELISH

1 package Lemon Jell-O
1 cup hot water
1 tablespoon vinegar
1/2 teaspoon salt
3/4 cup drained horse radish
1 cup cream, whipped
Dissolve Jell-O in hot water. Add vinegar and salt. Chill. When slightly thickened, fold in horse-radish and cream. Mold. Serve with baked ham. Serves 10.

Nothing To Report

Young Man Thought No Strike Meant No Story

A young man with a yen for newspaper work and a flare for short story writing joined the Springfield (Mass.) Republican some time ago. One of his first assignments was to watch the result of a strike vote being taken by trolley-men at midnight. When he failed to report at 1:30 a.m., the city editor sent an editor reporter for the results.

The cub strolled in just after the city edition went to press.

"There was no story," he said.

"They voted not to strike,"—Editor and Publisher.

Ah—it is a grand idea sweetening my morning cereal with BEE HIVE.

TRY IT TOMORROW

An East African Theory

Birds Seeking Nesting Sites When They Tap On Window

The discussion of the mystery why birds (including rooks, warblers, wagtails and sparrows) will on occasion tap on the windows of our houses has brought a conjecture from East Africa. It seems that the habit is more usual there than in England; and it is supposed that the birds are seeking nesting sites.

It is, I think, true that the tapping is more commonly heard in spring; but the explanation does not sound very convincing. Perhaps there are many causes; the reflection of the bird in the glass may be one; the perception of flies on the inside of the pane another. On this latter point my dog cannot pass the glass-paned door of a certain summer-house without stopping and casting a puzzled look at the faint effigy in the glass.

One correspondent, both puzzled and annoyed by the regular early morning hammering of a rook on the molar just below the window came to the conviction that the bird was mad; and dogs are not the only animals that go mad. Hens certainly lose at times the few wits they possess.—London Spectator.

Understood Perfectly

Farmer Had His Own Idea About Loan From Bank

During a financial panic a farmer went to the bank for some money. He was told the bank was not paying out money but was using cashier's checks.

He could not understand this and insisted on money.

The officers took him in hand, one after another, with little effect. At last the president tried his hand, and after a long and minute explanation some inkling of the situation seemed to be dawning on the farmer's mind.

Much encouraged, the president said: "You understand now how it is, don't you?"

"I think I do," admitted the farmer. "It's like this: When my baby wakes up at night and wants some milk, I give him a milk ticket."

Will Take Some Planning

"In another twenty or thirty years," says Frank Morrison, secretary of the American Federation of Labor, "I anticipate an average working week of 21 hours for all labor and a substantial increase in all wages." And then future generations can look forward to a workless week with still higher wages.

It's what you learn after you know it all that counts.

Canada Should Have A Substantial Surplus Of Wheat For Export

Ottawa.—A summary of the world wheat situation made public by the Dominion bureau of statistics stated that while Canada's crop is just being made and no official estimate of production is available, Canada should have an export surplus, at a minimum, of 200,000,000 bushels unless harvesting returns are disappointing.

As it is generally estimated that the Dominion requires 100,000,000 bushels for domestic consumption and next year's seeding, this would bring the estimate of Canada's crop to 300,000,000 bushels.

The official crop estimate by the bureau will be made Sept. 9, but the summary explained condition figures on July 31 indicated the best crop since 1932. In 1933 and 1935 the crop was around 281,000,000 bushels, whereas last year it dropped to 182,410,000 bushels. The crop for all Canada in 1932 was 143,061,000 bushels.

"Potential competition among the exporting countries for limited export outlets," the summary stated, "is the principal contributing factor to the current uneasiness in wheat markets. With respect to export competition, the Canadian government has indicated in connection with announcing the minimum price to growers, that the Canadian wheat board will not pursue a holding policy with the wheat it purchases. Accordingly the whole of the surplus from this year's crop may be regarded as available for export at competitive prices."

Uniform Company Law

Would Be Better For Dominion And Each Province

Vancouver.—Progress of efforts to draw up a uniform company law that would be acceptable to the Dominion and each province was described by R. Andrew Smith, K.C., of Edmonton. He spoke to a sectional meeting of the Canadian Bar Association on comparative provincial legislation and law reform.

Efforts to draw up a company law that would bring uniformity to the various and sometimes conflicting provincial company laws have been carried on by a committee and sub-committee drawn up at a Dominion provincial conference in 1935, Mr. Smith said.

Seek Canadian Committee

Seattle.—Two members of the newly appointed U.S. international highway commission planned to visit Premier T. D. Pattullo of British Columbia to ask his co-operation in immediate appointment of a similar Canadian committee to promote the proposed United States-Alaska road.

Fear Wheat Surplus

Washington.—United States government farm experts, disturbed by the prospective huge wheat surplus this year, said they were studying possibility of obtaining a long-term agreement among wheat exporting nations for a quota system to stabilize world wheat sales.

Going To League Assembly

Minister Of Justice Will Head Delegation From Canada

Ottawa.—Rt. Hon. Ernest Lapointe, minister of justice, will head Canada's delegation to the League of Nations assembly which opens in Geneva Sept. 12. Prime Minister Mackenzie King announced.

Other delegates will be Hume Wrong, permanent representative at Geneva; Joseph T. Thorson, M.P. for Selkirk; Paul Martin, M.P. for Essex East, and Mrs. Nellie McClung of Victoria. J. Scott Macdonald, first secretary of the department of external affairs, will be technical adviser to the delegation.

State Secretary Rinfret said he will leave Ottawa Aug. 27 on an official mission to Budapest, Hungary. He did not reveal the purpose of his mission. Mr. Rinfret also will inspect the Canadian archives in Paris and later go to Rome.

Barclay's Again Robbed

Bandits Hold Up Messenger And Escape With Mail Bag

Jerusalem.—Two armed bandits held up a messenger at the entrance to the Nabat post office and escaped with a mail bag believed to contain about \$10,000.

The funds belonged to Barclay's bank of London, which lost \$25,000 in a hold-up last week.

Second Lieut. R. F. H. Griffiths of the First Manchester regiment was killed when a military truck was blown up by a land mine near Acre. Two British privates were wounded.

The death list in the ambush of a Jewish bus atop Mt. Carmel and the subsequent battle between British troops and Arab rebels mounted to 18 when an Arab and three Jews succumbed to wounds.

In Front Trenches

Battalion Commander Is Daughter Of Rich Chinese Merchant

Hankow.—Central (Chinese) News Agency told of the 20-year-old beautiful daughter of a rich Kwangsi merchant who is fighting actively on the northern front at the head of 500 Kwangsi Amazons.

The young woman, according to the account, is Miss Mai Tienhua, daughter of Mai Wei-Shien.

"She first joined as a private," the report said, "but during the defence of Hsuehchow became a captain. In the fighting at Tingcheng, a town east of Hsuehchow, Miss Mai fought gallantly and for bravery she was promoted to battalion commander. She has participated in all engagements along the eastern section of the Lungshan line."

May Visit Oil Fields

Calgary.—Beverly Baxter, native-born Canadian member of the British parliament, now visiting in Eastern Canada, has been invited to visit the Turner Valley oil fields by the Alberta Petroleum Association.

Survey Of Unemployed

Discloses 20,000 In Western Provinces Have Never Worked

Calgary.—Twenty thousand young men and women in the prairie provinces have never been employed at steady work, Albert B. Duncan, member of the social research department of McGill University, Montreal, found during a two-year survey of the West's unemployment situation.

The West's greatest problem, he found, was the need of permanent jobs for 100,000 employable but unemployed wage earners.

Forty thousand of them are unemployed but employable wage earners who are at present receiving relief, he said in an interview here. Another 40,000 are unemployed but employable sons not receiving relief. They live by part-time earnings, savings and other means. The remaining 20,000 unemployed are young men and women.

Mr. Duncan, on route east after spending a holiday at his home in Banff, said the total of 100,000 does not include 45,000 farmers who have been on relief in the prairie provinces.

Mr. Duncan urged a long-range planning program for the care of the jobless, the Dominion government to assume responsibility of relief and introduce a system of unemployment insurance.

Has Not Been Considered

Premier King Had No Official Comment On Immigration Plan

Ottawa.—The government has been following with interest published reports of investigations being carried out in British Columbia of the possibilities of assisted immigration of British families, but no formal consideration has been given the proposals.

Prime Minister Mackenzie King said he knew of the surveys being made in northern British Columbia by Sir Henry Page Croft and General M. L. Hornby, but had no official comment to make on their plan to interest the British, Dominion and provincial governments in an assisted immigration plan.

Crerar Approves Survey

Thinks Conference On Canada's Underdeveloped Wealth Would Be Valuable

Winnipeg.—The federal department of mines and natural resources would be glad to call a conference with provincial governments to survey Canada's undeveloped wealth in agriculture, mining, water-power and timber, Hon. T. A. Crerar, minister of mines and resources, said here.

"But I feel there should be general unanimity as to the desirability and usefulness of such a conference before any steps were taken to convene it," Mr. Crerar said, indicating such a survey would be of great value.

MATCHES RECORD

Mrs. Gwen Spencer Hethey of Victoria, B.C., amazed veteran marksmen at the Dominion of Canada Rifle Association Meet when she led 150 snipers into the final round of the Governor-General's Medal competition by posting a record-equaling score of 105. Mrs. Hethey shot possible at the 200, 500 and 600 yard ranges.

Should Be Cut Quickly

Grain Too Badly Rusted For Threshing Makes Good Feed

Saskatoon.—Recommendation that crops too badly rusted for threshing be cut immediately for feed was made by Professor J. W. G. MacEwan, of the University of Saskatchewan animal husbandry department.

The livestock man said he had received numerous requests respecting the value of rusted grain in livestock feeding. Apart from the fact such feed was less palatable than non-rusted grains, it was equally high in nutrient quality, he explained.

Professor MacEwan did not recommend the cutting of all rusted grain for feed. Only crops too far gone for threshing should be cut immediately, he said.

Popular Magazines Banned

German Secret Police Put Readers Digest On Forbidden List

Berlin.—The secret police have banned the Readers' Digest indefinitely from Germany and all foreign translations and editions of the former Austrian Chancellor Kurt Schuschnigg's book, Dreimal Österreich ("My Austria") the official gazette said. No reason for the banning of the Readers' Digest could be learned, but it was presumed known by the "National Socialist" as anti-German in the August issue of the magazine were the cause.

Hundreds Of Refugees Crossing Frontier Into France and Switzerland

Labor Cost Is Handicap

Chief Obstacle To Building British Aircraft In Canada

Winnipeg.—Western Canada will probably share in the proposed British plan to build airplanes in Canada only if it emerges as a long-range plan over a period of five or more years, Sir Edward Ellington said here before departing for Fort William.

Sir Edward, inspector-general of the Royal Air Force and a member of the British mission visiting Canada to inspect possible facilities for manufacture of planes and parts, arrived here from the Far East via the United States and Vancouver.

Chief handicap to the scheme of building aircraft for the R.A.F. in this country is the cost of labor, Sir Edward said. He thought labor was twice as high here as in Great Britain.

Western Canada's hopes of sharing in the project were not bright for the immediate future, he said. "It would take at least two years before anything could be done in the west."

Must Hoard Grain

Germany Sees It Desirable As A Preparedness Measure

Berlin.—Joint manoeuvres next month of from 500,000 to 1,000,000 German regulars and reserves will be accompanied by a phase of war preparedness concerning which little has been said—the hoarding of grain.

According to the Berlin newspaper Märkische Volksbeobachter, the leaders of which are largely Brandenburg and Pommern farmers, the strained international situation makes it seem desirable for Germany to "bank upon a storage policy to the fullest extent possible."

In the German view, grain hoarding—like the fall manoeuvres—should not be regarded as an indication of warlike or aggressive intentions, but merely as a preparedness measure. A decree of last Friday authorized the government to commandeer storage space.

Showed Large Decrease

Less Wheat Shipped Overseas From Canada Last Crop Year

Fort William.—Figures released by the statistics branch of the board of grain commissioners showed a large decrease in overseas shipments of Canadian wheat during the crop year ended July 31, 1938, compared with the previous year.

During the 1938 crop year 77,137,674 bushels of wheat of all varieties were shipped overseas in comparison with 145,886,172 bushels the previous year.

Total exports of wheat and wheat flour during the crop year were equivalent to slightly more than 95,500,000 bushels of wheat. The carry-over of 24,393,801 bushels in all positions at July 31 is the smallest for a number of years.

Basel, Switzerland. — France and

Switzerland strengthened their border patrols to block an increasing flow of refugees from Germany and Austria along a secret "underground railway" through Nazi territory.

Swiss detectives questioned 400 refugees who made themselves known to the authorities at Basel after crossing the frontier. They pieced together an amazing tale showing existence of a 20th century hush of the "Scarlet Pimpernel" of the French revolution and the "underground railway" of American civil war days.

The flood of refugees, most of them Jews, is not a chance migration, the detectives learned, but the result of operations by a secret organization among Germans and German Austrians who feared for their lives under the Nazi regime.

Cash came from refugees who left Germany and Austria before the Nazi regime, and from various underground sources in Germany and Austria.

From Austria, the Swiss police said, many refugees went through Bavaria not far from the Berchtesgaden mountain retreat of Chancellor Hitler, and then into Switzerland or France from Baden.

The refugees explained the route of the "underground railway" through Bavaria because control in Bavaria and Baden was less strict than in newly-Nazified Austria.

The refugees told the Swiss harrowing tales of reaching the frontier by cross-country hikes on which they hid in woods and on farms in constant fear of capture by Nazi border patrols.

Hollick-Kenyon Honored

Lethbridge Names New Airport After Celebrated Canadian Pilot

Lethbridge, Alta.—Lethbridge's new municipal airport, the largest yet constructed in Canada, will be named Kenyon field during official opening ceremonies here September 14.

The name will honor Air Commodore Herbert Hollick-Kenyon, well-known Canadian flier, now a member of the staff of Trans-Canada Airlines. He landed the first air mail in Lethbridge in 1929.

The official opening will be marked by a gala air meet here at which leading figures in Canadian and United States aviation will attend. Hollick-Kenyon has already signified his intention to attend.

The official internationally known for his flights over the South Pole with Lincoln Ellsworth and the Arctic in search of the lost Russian fliers.

Refugees May Stay

Berne, Switzerland.—Police chiefs of the various Swiss cantons decided that more than 1,000 refugees who have crossed the Swiss frontier illegally from German Austria would be tolerated for the present. A warning was issued, however, that all would be shipped back if the flood of refugees continued.

Report of Dispute Over British Foreign Policy Is Called Preposterous

London.—Reports of disagreement between Prime Minister Chamberlain and Foreign Secretary Viscount Halifax over Great Britain's foreign policy in relation to Germany were described in official circles as "preposterous and mischievous at this time."

There was no indication in Whitehall of any major conflict between the two government leaders, nor any promise that Great Britain would see another incident comparable to the resignation last February of Foreign Secretary Anthony Eden. Reports said Viscount Halifax had concluded Eden was right in his plea for a firm stand against the dictator countries, giving rise to rumors the foreign secretary might seek to be relieved of his duties.

The reports apparently originated in London's Czechoslovak colony. It was recalled, however, when Lord Halifax accepted the post after Mr. Eden resigned last February, he said he wished his appointment to be of short duration. Mr. Eden resigned in protest against Prime Minister

Chamberlain's policy of negotiating with the dictator countries, particularly Italy, without prior promises.

The reports suggested Lord Halifax was worried by the delay in ripening of the Anglo-Italian agreement, signed at Easter but never made effective; the persistently insoluble appearance of the Spanish civil war, and the tendency of the dictators to draw even more closely together.

On the other hand, it was believed the reports might have arisen from Crerar's thinking, as a stiffening of the British attitude towards Germany would strengthen them in their fight against demands of the Sudeten German minority in their country.

In Whitehall there was no indication Mr. Chamberlain intended any departure from his policy of European appeasement, despite slow progress.

It was suggested also that Lord Halifax, who had left for a week's holiday, hardly would have gone if any crisis were pending.

FRUIT GROWING ON THE PRAIRIES

The prairie farmer will soon be growing delectable bronze-gold apricots on his land if the successful experiments at the Dominion Experimental Farm at Morden, Manitoba, are any criterion. Our photograph shows the harvesting of the "Scout" apricots, known as "Morden 600" from a 12-foot apricot tree which bears apricots 1 1/2 inches long. The original seed was received as exchange from a co-operating horticulturist in Manchuria, and has proved very successful. It is hoped the "Scout" apricot experiments at Morden will lead to a series of hardy quality apricot trees in prairie gardens, in addition to the apples, pears, cherries and other fruits which the Dominion Experimental Farms have made possible.

Canadians Should Not Depend On Any Other Country For Defence

Ottawa.—Principal reaction in Ottawa to President Roosevelt's Kingston speech assuring Canadians the United States would not stand idly by and see Canada under the domination of another power, was one of appreciation, coupled with the feeling Canada should nevertheless continue development of its own defence forces.

Even if the United States came to Canada's assistance in repelling an invasion of this country, according to those interested in national defence, the United States would as a matter of duty be required to "do their own bit."

Mr. King spoke of the close ties binding Canada and the United States, their common frontier of 4,000 miles, unarmored.

"Like him," (Mr. Roosevelt), Mr. King said, "I have sought whenever and wherever the opportunity has presented itself, to further and cement the ties of international friendship and goodwill, not alone between the English-speaking coun-

tries of the world but between all countries."

Officials in Ottawa would not comment, since the Roosevelt pronouncement was a matter of policy and not of administration. Opinions of others closely associated with militia activities, however, stressed the care with which Mr. Roosevelt clothed his sentiment. It indicated the United States would not tolerate domination of Canada by another foreign nation.

Domination of Canada, it was pointed out, could come only after a conflict in which Canada had been defeated. In that case the United States would not permit a victorious enemy to hold this country as one of the spoils of war. That meaning was extracted from the president's speech as the primary one. Another, in that to avert such a condition, the United States would at the outset assist Canada to repel an invader. The president's utterance, it was stated, was capable of both interpretations and might conceivably embrace both.

A TRIP TO VICTORIA

The Capital City of British Columbia

"Follow the birds to Victoria"—the
slogan that lures many vacationists
and tourists to beautiful Vancouver
Island, is responded to increasingly as
each year passes on.

Kipling described it in the fol-
lowing words: "To realize Victoria you
must take all that the eye admires
most in Bournemouth, Torquay, the
Isle of Wight, the Happy Valley at
Hong Kong, The Doon, Sorrento, and
Camps Bay; add reminiscences of the
Thousand Islands, and arrange the
whole around the Bay of Naples, with
some Himalayas for the background."

After three strenuous days at the
annual convention of Canadian Week-
ly Newspapers Association, a visit to
this interesting and famous city came
as a fitting climax to the program
arranged by the convention entertain-
ment committee, so ably headed by
Edgar Dunning, of the Ladner Opti-
mist; Lorne Graham, of Barber-Elis
Ltd.; Dugald Campbell, of Canadian
Lintype Ltd., and Charlie Gordon,
genial manager of Toronto Type
Foundry Co. Ltd.

C.P.R. Steamers Provide Enjoyable Trip

Sunday morning, August 14, saw
the convention party boarding the
"Princess Kathleen," and promptly at
10:30 the gangway was withdrawn
and gracefully the ship glided from
the dock. The only fly in the oint-
ment was the unfortunate would-be
passenger and his wife who came
rushing to the pier just too late to
board the ship, and passengers on the
decks silently sympathized with them
in their disappointment as they saw
him drop his hand-baggage on the
dock, stare at his wife, and she stared
back at him, with feelings that can
easier be imagined than described.

Quickly gathering speed, our good
ship (all ships are presumably good,
until they begin to roll) passed Van-
couver's popular Stanley Park; under
the imposing bridge being con-
structed for Pacific British Prop-
erties Limited, and turned southward
for its 83-mile trip to Victoria.
Throughout the four hours run, land
is continuously in sight, either of the
coast lines of the mainland and the
island being in view. Various
islands of considerable size are passed,
and as the ship passes through
Active Pass, a beautiful scenic water-
way, close-up views of the shore are
obtained.

At noon the first call for luncheon
is sounded and as appetites have been
sharpened by the morning air, tables
in the handsomely appointed dining
saloon are quickly filled for the first
sitting. Meals on C.P.R. steamers
are always bountiful and this was no
exception. So, being well regaled, we
felt in better humor than ever to en-
joy the balmy air of the Pacific and
watch the friendly seagulls as they
chirped and dived after scraps of food,
marvelling at their speed and grace
as they kept pace with the ship trav-
elling at 25 knots per hour, and oc-
casionaly stealing a ride on the awn-
ing or lifeboats, while occasionally
one more venturesome than the rest
would perch proudly on the flagstaff
at the stern. So tame do these birds
become that they will soar right up
to a person's hand and take food as
they fly.

An incident that amused us was
that one old gray bird among other
younger birds on the awning had a
hard time getting his share of the
bits, and it brought home the re-
minder of the survival of the fittest.
One could almost picture the veteran
eventually floating down to the sea
for the last time, never to arise
again, while his younger voracious
mates would continue their daily
flights with the ships until they too
would succumb. There are no social
security laws governing wild life—
when you become too old or incapaci-
tated, and can no longer fight for a
living, you simply die.

However, these reflections are by
the way. Soon we sight the city of
Victoria, and preparations are made
for landing. Approaching the inner
harbor, the parliament buildings and
the famous "Empress" hotel, charm-
ing and peaceful Canadian Pacific
Railways ivy-covered hostelry, domi-
nate the harbor front. Over 1400
passengers are soon disembarked, and
large buses are waiting to convey

them to points of interest on the Is-
land.

Through the courtesy of the daily
newspapers of Victoria, the Colonist
and the Times, the convention party
was taken to the Observatory, from
which are sent out the meteorological
reports which are heard daily over
the Canadian Broadcasting Commis-
sion network, and which has the sec-
ond largest telescope of its kind in
the world.

After a few minutes' view of the
surrounding district from this point
of vantage, about 1000 feet above sea
level, the drive is continued to the
famous Butchart Gardens. Here sev-
eral acres of land, from which some
years ago rock was quarried for a
government works owned by Mr. Butchart,
has been transformed into a fairyland,
from twelve to fifteen gardeners be-
ing always employed.

The grounds are always open to vis-
itors, and thousands visit them every
year. It was our pleasure to meet
Mr. Butchart, a courteous gentleman
over 80 years of age, and a brief visit
in his home proved interesting. Not
only is it most lavishly furnished, but
he has a swimming pool, billiard ta-
ble, bowling alley, pipe organs and
pianos for the diversion of his in-
timate guests. He remarked that he
enjoyed seeing others derive pleasure
from a visit to his gardens, pointing
out various improvements which were
being made or contemplated.

As the writer had lingered a little,
and someone called to join the rest
of the party, the courteous host led
us by a short cut through the house,
and passing through the kitchen, one
observed it was so efficiently equipped
that many a housewife would have felt
it would be a pleasure to have at her
disposal such facilities for preparing
the family meals, with electrical ap-
pliances on all sides.

So many enquiries have been made
by visitors for seeds from these gar-
dens, that Mr. Butchart established a
small store at the entrance to the
grounds, where they may be obtained
for a small charge, and the proceeds
are given to charitable institutions.

After nearly three hours delightful
tour, our buses arrived at the "Em-
press" hotel, where we were glad to
enjoy a rest after a rather strenuous
day.

Having visited the new Christ
Church cathedral while on a visit in
1933, the writer and his "better half"
decided to again attend divine service
there. Dean Quinton was at the
time the preacher. He has since
passed to his rest, and a new dean,
recently arrived from England, gave
a very forceful address, which was
broad-based, but a trifle too long for
a summer's evening. The cathedral
was almost filled, a large number of
visitors attending. It is reported that
about a half million dollars has been
spent on its erection, and it will re-
quire an equal amount to finish. It
was commenced in 1928. Graves of
some of the early residents of Victo-
ria, some almost 200 years old, (the
graves, of course) are seen in the
grounds of the cathedral.

It was with a feeling of peace that
we settled down for a night's rest in
the hotel, and early next morning we
called up old acquaintances of prairie
days and enjoyed their company.
Time for the return to the mainland
came all too quickly, and parting
good-byes at the boat were soon over,
for time and tide wait for no man,
neither do C.P.R. passenger ships.
return trip on the "Princess Mar-
guerite" was made during the really
beautiful August afternoon, and the
Port of Vancouver was reached at 6
p.m. Here our party dispersed, some
to continue their journey eastward to
their homes in various parts of the
Dominion, others making a trip to
Alaska, while others tarried for a
few days to see something more of
the fertile Fraser Valley and its peo-
ple.

There is no better way for people
of the various provinces to become
acquainted with each other's prob-
lems than by travelling, and in a
later issue some impressions will be
given of Premier Pattullo and his
views on British Columbia's problems
and the projected Alaskan highway.

may be supplied, at lowest current
prices. Printed gummied paper orders
should be given one month ahead of
requirement, as it takes that length of
time to put the orders through the
factory.

Trans-Canada Airways Pilots Land At Coleman Airport

Big Machines Carrying Pilots as Passengers Include
Local Field in Flights from Winnipeg to Vancouver

Trans-Canada Airways Lockheed
monoplanes of the latest type of 14-
passenger capacity made landings
here on Thursday and Saturday; on
the airfield west of Coleman. The
first landing was on a flight from
Winnipeg to Vancouver, with two pi-
lots in charge, and eight pilots as pas-
sengers, who were being taken over
the route as part of their training
course. They were making landings
at all airfields on the route, and had
been north to Edmonton.

On Saturday the same plane re-
turned with another group of pilots,
nine in number, and two in charge,
making a smooth landing here. Land-

ings, at all principal and intermediate
fields on the T.C.A. route from Van-
couver to Winnipeg were made, as
well as on all fields from Lethbridge
north to Edmonton.

It is expected that mail service will
be started this fall, though regular
training flights have been in progress
for several months; including night
flights non-stop from Winnipeg and
Vancouver. Four planes of the T.C.
A. now pass over here every day, and
in addition the route is used by pri-
vate planes, including those of Con-
solidated Mining & Smelting Com-
pany, Ltd.

The Churches

ST. ALBAN'S CHURCH

Rev. R. Hague, Incumbent
Eleventh Sunday after Trinity—
Morning prayer and sermon, 11 a.m.
Holy communion on Saints' days at
10 a.m.
Picnic September 3 For Children
The parochial picnic will be held on
Saturday, September 3, at Crow's
Nest Lake. There are many children
of our Sunday school whom we would
like to have attend. If there is any-
one who would like to help out with
the transportation, will they please
be at the parish hall not later than
2 p.m. This is an endeavor to get
together before carrying on our au-
tumn work. Those attending this
party are asked to bring their own
lunch. All adults and young people
of the church are cordially invited to
attend.

CHURCH OF THE NAZARENE

The friendly church on Main Street.
Pastor, Rev. C. H. Moonihan; assis-
tant and organist, Gunnell Berglund.
Services: Sunday school at 11 a.m.,
classes for all. The special Sunday
contest which has been running for
three months will come to a close this
Sunday. Prizes will be awarded to the
faithful. 12 o'clock noon, morning
worship. 7:30 p.m., evangelistic ser-
vice, with sermon by the pastor, and
special music.

Tuesday, 7:30 p.m., Prayer meeting.
Friday, 7:30 p.m., Bible study.
Wednesday, August 31, 7 p.m., the
first meeting of the Junior Missionary
Society will be held in the church.
Strangers and visitors are always
welcome.

Junior Missionary Society Organized at the Nazarene Church

A junior missionary society was or-
ganized at the Church of the Na-
zarene, with the following officers and
fifteen members: President, Fay
Grant; vice-president, Patsy Gamble;
rec. secretary, Theresa Genario; cor.
secretary, Audrey Grant; treasurer,
Douglas Snowdon; chorister, Audrey
Grant; social committee, Evelyn Gam-
ble, Patsy Gamble and Douglas Snow-
don; ushers, John Ferrara and Doug-
las Snowdon. The aim of this society
is to study the missionary work of
the various foreign fields, and to do
handwork for the same. The first
meeting is scheduled for Wednesday,
August 31, at 7 p.m.

UNITED CHURCH

Rev. and Mrs. H. J. Bevan and
Douglas have returned from their ho-
liday. The minister will be in charge
of the service on Sunday morning at
the usual hour. All members and
friends are urged to attend the ser-
vices.

"God hath not given us the spirit of
fear; but of power, and of love, and
of a sound mind."—2 Tim. 1:7.

Government's Financial Statement Shows Heavy Increase in Levies

Monthly Dividends Apparently "Dead Issue" As No Mention Made in "Democracy Day" Celebration on Third Anniversary of S. C. Election.

(By T. B. Windsor) — The Social Credit party having duly celebrated "Democracy Day"—the third anniversary of the Alberta provincial election in which 54 per cent of the total vote gave Aberhart's group 85 per cent of the legislature seats—the province of Alberta this week was getting ready to start the fourth year of Social Credit administration.

The "Democracy Day" meetings were held in various parts of the province, without sign of a crowd even resembling the 20,000 which Aberhart claimed attended a previous anniversary celebration in Calgary. Nor did the speakers at Monday's talk-fests indicate whether the province should anticipate the return of democracy, or mourn for its passing. The speeches generally were the same texts as have been used since early in 1935, there being no accomplishments to discuss.

The government's financial statement for the fiscal year's first quarter, which ended June 30, was made public last week. It showed heavy increase in levies taken from taxpayers in comparison with the corresponding period for last year; a total of \$7,125,622 was collected by the government during the three months, an increase of \$406,491. Total expenditures for that period increased \$217,047 to a total of \$5,563,064.

Those figures are on the basis of the most optimistic version possible, inasmuch as all governments like to collect all the accounts they can, and not rush too much about paying off obligations, when it is time to show a report. These expenditures do not include something over three quarters of a million dollars which is being withheld in reduced interest payments on the provincial debt, or \$31,000 which was cut from relief grants in comparison with last year.

Dominion government grants for direct relief in drought areas were increased by almost \$345,000.

When these items are considered, said the observers here, it is obvious that, despite the reduced payments and grants, Alberta's government is costing steadily more, although an amount close to \$25,000,000 has been defaulted in the last three years and is not taken into account in expenditures.

Reduction of \$267,727 in the provincial debt, to a total of \$156,747,689 was announced for the three months. Most of the decrease was accounted for in savings certificates, of which about \$7,000,000 are still outstanding. The total figure on the provincial debt does not include the \$7,000,000 interest defaulted, but does count the unpaid and overdue maturities of principal.

The attack by Premier Mitchell Hepburn, of Ontario, on the Rowell

Local News

Mr. and Mrs. Cecil Milley visited at Lethbridge on Saturday.

Mr. and Mrs. Richard Tiffen and family are spending a week at Calgary.

Mr. and Mrs. J. J. McIntyre are on vacation in British Columbia.

The Misses Margaret and Ethel Dunlop left on Monday for a visit at Calgary.

Mrs. T. Kahout left on Tuesday where she is the guest of her daughter, Mrs. G. Neilson.

Mr. Fred Geurard, of the McGillivray Creek Coal Co. staff, is on two weeks vacation.

W. Bell, of the Grand Union hotel, and daughter Mae motored to Calgary on Tuesday.

Mrs. J. Hedberg and daughter Alma, accompanied by Mr. Gilbert Hoyle, left on Sunday for a vacation.

Mr. and Mrs. W. Burrows left on Wednesday for Salmo, B.C. where they are the guests of Mr. and Mrs. Robt. Thompson.

Mr. Hugh Dunlop was a Cranbrook visitor last week, the guest of Mr. and Mrs. E. Marlow.

On Friday Mr. Hugh Dunlop, accompanied by his son Raymond and I. Dixon, motored to Calgary.

Hugh Dunlop has been appointed to a school in Cold Lake district, north of Vermilion, Alberta.

Mr. and Mrs. Ernest Hill and family, accompanied by Mr. and Mrs. Steve Penny and family, returned from a vacation at Vancouver on Saturday evening.

Mr. A. W. Kennedy, who has been relieving at the local bank, left over the week-end for Graman where he has been stationed.

Helen Dibble, who this year completed her teacher's training course, has been appointed to Chapel Rock school in the Lundbreck district.

Miss Julia Ondrus has returned to her duties as nurse at Holy Cross hospital, Calgary, after spending a vacation with her uncle and aunt, Mr. and Mrs. Joe Kapalka.

Golf Week in The Canadian Rockies

The Banff Springs Hotel's annual golf week is set for August 22-27, and the contest for the long list of cups and prizes will be waged in a mountain setting so beautiful as to make the old adage, keep your eye on the ball, doubly difficult of fulfillment.

Golf week at the Banff Springs course will see many notable U.S. and Canadian amateurs with a sprinkling of British and European entrants, fighting it out for the Edward Prince of Wales trophy, put up by former King Edward VIII, and the Willingdon cup for men, Associated Screen News cup and the Brewster trophy and a host of other coveted awards for women.

As much a social as a golfing event, Banff's golf week is the signal for a round of informal entertainment centred at the baronial Banff Springs hotel, beneath the terrace of which the great golf course winds down over the Spray River for 5,640 yards of unrivalled fairways and greens. A "golfer's ball" in the big hotel

ballroom Saturday night brings the week to a close with presentation of cups and prizes.

The spectacular Banff Springs course has its fairways laid along the valley of the Bow River into which the rushing Spray dumps its green waters beneath the towering first tee. Unmatched for beauty, the course also ranks among the world's best for its length, thickness and general smartness of design. Pictures above show the Edward Prince of Wales Cup and views of the course.

CONSUMERS AND PRODUCERS BENEFITTED BY PRORATION

The practice of proration in Turner Valley oil fields has been widely discussed, perhaps frequently by those who do not know just what it means. Proration is simply sharing the available market for oil among the producers.

For example, suppose there were an oil field with 10 wells, capable of producing 8,000 barrels a day. Given a market for all of it, there would be no difficulty. But assume that the market available from this field is only 4,000 barrels a day. Under proration, each would be allowed to produce only half as much as it could produce if it were running wide open. Proration is desirable not alone in the interest of the market. It is of great benefit to the consumer.

Potential production and marketable production are two different things. In this is found the underlying reason for proration. [13]

WORLD HAPPENINGS BRIEFLY TOLD

The opposing sides in Spain have accepted a three-man British commission to mediate an exchange of prisoners.

Since her maiden voyage in June, 1935, the French liner Normandie has crossed the Atlantic more than 100 times and carried 230,137 people. The record round-trip flight to New York by the German airliner Brandenburg may be followed soon by a round-the-world flight.

The death of John MacKenzie, 78-year-old uncle of Lord Tweedsmuir, governor-general of Canada, has been announced. He died recently at Broughton, Peebles, Scotland.

Due to a wartime scarcity of leather, Japanese bicycle riders have received permission to wear wooden shoes while riding, a practice formerly strictly forbidden as dangerous.

One of the oldest women in Nova Scotia, Mrs. Margaret Mackenzie of Westville, celebrated her 106th birthday at the home of her son, Dan Mackenzie.

Anthony Eden, former foreign secretary, will be the principal speaker at the annual meeting of the Peace Society at the Guildhall, October 18, it was announced.

The United States treasury announced the seizure at a Brooklyn pier of the largest single shipment of illicit opium in more than a decade. Officials said the quantity seized was worth about \$600,000.

Prime Minister Mackenzie King, who has been busy at his official duties in Ottawa throughout the summer, faces an equally busy autumn and will delay his proposed visit to western Canada until October at the earliest.

Extols Virtue Of Honey

New York Doctor Considers It Most Valuable Food

Honey is "Nature's own sweet, untouched by human art," according to Dr. Rodog Beck, writing in his book, "Honey and Health."

"Honey and other simple and natural sugars, like that in dates, figs, raisins, etc., are live physiological sugars which contain the germs of life, while industrial sugars are anti-physiological, dead, or, as a matter of fact, murdered sweets," he writes.

Pursuing this line of thought, Dr. Beck deems honey in hot water better than alcohol as a quick pick-up; he says that the ancient Greeks athletes wisely used it before entering the arena; that it prolongs life, being responsible for Anacron's living to the age of 115, Pythagoras to 90, and probably for the long life of Moses and Methuselah, while Thomas Parr, who died in 1657, at the age of 152, was devoted to a honey drink known as metheligen.

It is a good expectorant, according to Hippocrates; a diuretic, according to the Koran; an aphrodisiac, according to Norman Douglas; an anti-rheumatic, according to Dr. Beck's correspondent, J. L. McD., of Marion, Ind.; an anti-diabetic, according to Dr. A. V. Davidson, of Russia; a bactericide, according to Chinese and the Hindus, and a New York State subscriber to the American Bee Journal; it is also an excellent preservative and one of the finest cosmetics. And the date is the only edible substance which surpasses honey in calories.

Had Celebrities For Clients

Man Who Built Huge Candle For Caruso Is Dead

Antonio Ajello, 78, one of the world's leading candlemakers, whose clients included Enrico Caruso, Col. Chas. Lindbergh, Mussolini and Mrs. Franklin D. Roosevelt, is dead. In his New York workshop he prepared many of the craft secrets of the medieval guilds, including the arts of timing candles, perfuming them, and sculpturing them. He came here from Italy at the age of two. When Caruso died he built a candle, 18 feet high, five feet in circumference. It cost \$3,700 and it burned a year in a church in Pompeii.

Farmer Was Surprised

Tempted by a field of ripe corn, a tourist passing through Gilead, Ont., recently stopped and picked a few ears. The farmer, passing a few hours later, was surprised to see an envelope tucked to a fence post. Still more surprised was he when he opened the envelope, and found it contained a dollar bill and a note reading, "Thanks for the corn."

During the Civil War, the North maintained one of the longest blockades in history. The blockade was 8,500 miles long and was held, for the most part, by merchant ships.

CANADIAN VOLUNTEERS RETURN FROM THE SPANISH FRONT

Re-patriated to Canada under the general repatriation scheme the Spanish Government is putting into effect for foreign volunteers, the above group of Canadians, most of them having served for the past two years in the Mackenzie-Papineau or the Lincoln battalions on the Loyalist side, returned to Canada on the "Empress of Britain". They are, from front row, left to right: Joseph Laurin, of Toronto; Walter Woodman, of Port William; David Harvey, of Vancouver; and John Kellamant, of Toronto. Standing: John Gilstrap, of Vancouver; Sam Stefanuk, of Toronto; Lloyd Evans, of Regina; James Wilson, of Edmonton; and James Bayden, of Winnipeg. Some of the boys admitted they were "war weary".

MAKE AN ENTICING NEW STYLE

By Anne Adams

A perfect "runabout" dress for Fall—this softly feminine shirtwaister with a swing skirt! You're certain to look your most youthful and debonair self in Anne Adams' Pattern 4918, and what fun you're going to have stitching it up! Notice how ornamental a regiment of buttons and a dear little bow—don't you like the Sewing Instructor makes it "easy as pie" to sew both long and short sleeve versions. Pattern 4918 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38 and 40. Size 16 takes 3½ yards 39 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for the Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

An Insulin Herb

Old Indian Remedy Being Investigated By Doctors

Possibility of a new source of insulin, obviating the necessity of hypodermic injections for diabetes, is seen in the experiments of Dr. R. G. Large and Dr. H. N. Brockleby of Prince Rupert, B.C., with an old Indian herb remedy. The experiments are reported in the Canadian Medical Association Journal and deal with the roots of "devil's club," a shrub that grows wild on the Pacific coast. Made by boiling bark from the plant roots, the extract, taken through the mouth, has given remarkable results in reducing sugar in the blood of diabetic rabbits, the article said. The doctors' attention was drawn to the remedy through use of it by a patient, with apparently good results.—Brandon Sun.

Seems Quiet Enough

American Writer Found No War Scare In London

This story by Ernest L. Meyer appeared in the New York Post:

I arrived in London under a misapprehension, judging from the war scare stories printed in the American press this year, I imagined that every man, woman and baby in this metropolis walked the streets in gas masks and anxiously inquired of the traffic policeman the road to the nearest bombproof shelter.

In my two days in London I have seen no gas masks and no refuge from air bombs, though I understand a model bomb and gas-proof shelter is being exhibited somewhere, mostly, I suspect, for the benefit of tourists and for an admission fee. Because the British have a habit of exacting admission fees for all sort of points of interest from the chapel in Westminster to the historic tavern where Dr. Johnson spilt his wit with a schooner of sack.

Now I have wandered about considerably in London and talked to sundry citizens ranging from college professors to taxi drivers, and nowhere have I found evidence that the average London resident is living in a state of jitter with one eye turned to the zenith in search of a Zeppelin.

In fact, the average male from Piccadilly to points east and west walks the streets briskly and confidently with apparently no object in life except to prove to foreigners that an Englishman can wear a bowler and swing a tightly-rolled umbrella and still look like the backbone of an Empire.

There are compensations in everything. A glass eye, for example, never catches cold from the draft through a keyhole.

Thirty-four per cent of the world's copper resources are in Chile. The United States has about 20 per cent.

Quite Forgotten

Man Who Stops Advertising Is Like This College Professor

A supernumerary Toronto University professor went to Europe for a year immediately after his release—this after 40 years with the University. When he returned, he went to Hart House to luncheon, and fully expected that his old professional associates would greet him as the Prodigal Son was greeted by his father. But, with a single exception, the men present paid not a particular of attention to the returned professor. One man saw how the old professor was hurt by the non-welcome, and had the grace to make a small fuss over him.

As I listened to this tale I thought of how an advertiser who quits advertising is unmissable — of how promptly the public forgets, of how unperceived is the return of a long-absent advertiser. An advertiser can keep himself in the public's eye and favor only by persistent advertising. Let him quit advertising, and the public forgets him as quickly as it forgets the dead.—J. C. K., in Marketing.

The World's Great Need

Is Enlightened Leadership Which Today's Youth Must Furnish

If there is one commodity in which the world is short today, it is enlightened leadership, states the Romanian Magazine. The need is written in every new day's headlines. As men and citizens we should be looking ahead to preparing enlightened leadership for tomorrow. And from whence will it come if not from the ranks of healthy, normal boys, the sons of good parents, the products of the hard-won advantages of our civilization?

Comes news of a college professor who quit teaching European history and went into retirement. He couldn't keep up with it.

"You know, dear, marriage is a serious business. When we are married you'll have to cook my meals."

"Yes, darling, and you'll have to eat them."

—Schweizer Illustrierte, Zolingen.

SUNDAY SCHOOL LESSON

AUGUST 28

ELI: RESPONSIBILITY FOR OTHERS

Golden text: Train up a child in the way he should go. Proverbs 22:6a.

Lesson: I. Samuel 2:12; 4:18.

Devotional reading: Galatians 6:7-10.

Explanations And Comments

The Message that Came to Samuel, I. Samuel 3:11-18. The Voice became to Samuel a Vision, for he seemed to see Jehovah standing before him and saying: "Behold, I will do a thing in Israel, at which both the ears of every one that heareth it shall tingle." The latter clause is a proverbial expression meaning that the news will create great astonishment and alarm. The next chapter tells what the news would be—the defeat of Israel by the Philistines, the capture of the ark, and the death of Eli's sons and of Eli himself. "In that day I will perform against Eli all that I have spoken concerning his house," see 2:27-36. The preliminary judgment on Eli's sons followed swiftly, but that on Eli's house came some 20 or 30 years later. "I will punish (judge) him because of the evil which he well knew about, for his sons brought a curse upon themselves and he did not restrain them." Eli had associated his sons with him in the priesthood although he knew that they were utterly unfit for the office, having given themselves up to the licentious, idolatrous practices of their Canaanite neighbors, and were using the priesthood for their own gain, even seizing the offerings for their own table. Eli had merely rebuked them mildly.

The iniquity of the fathers is visited upon the children, but so also, is the iniquity of the children visited upon the fathers who neglect their duty to their children.

The Result of the Battle, I. Samuel 4:8-11. "These are the gods that smote the Egyptians with all manner of plagues in the wilderness," exclaimed the Philistine in fear when they learned that the ark was in the hands of Israel. "They were as much in their history as in their divinity," remarks Matthew Henry. "In the wilderness" is thought by some scholars to be a conscious rendering of the Hebrew text; a slight alteration in the Hebrew would give "and with pestilence." The presence of the ark with all its sacred associations did not save from defeat the Israelites of greed and licentiousness (2:12-17) were slain.

The Death of Eli, I. Samuel 4:12-18. When an advance runner came to Shiloh to report the result of the battle, his rent clothes and the earth upon his head proclaimed his sorrowful news. Eli was sitting upon his customary seat by the wayside watching for him, for his heart trembled at the ark of God. Probably he had not approved of its being taken into battle, but with his customary weakness he yielded to the elders. When the poor blind old man (he was 88 years old) heard the report he fell off his seat backwards and broke his neck in the fall.

Opinion Worth Heeding

Swing Music Harmful To Good Taste States Authority

Whenever one perceives sneers or hears derogatory remarks directed against young people gyrating to swing music, the usual response is to say, "Ah, well, let the kids have their fun. It's harmless." But we are not so sure of our position, now that the highest authority in the dance world has spoken. Swing is harmful and degenerate, says Donald Grant, president of the Dancing Teachers Business Association, at the annual convention of the organization in New York. There is no question here of morals; the harm is to good taste, grace and poise, and the degeneration has to do with style.

Because of the great influence he wields, the dance masters' chief executive should be heard with respect.—Buffalo Courier-Express.

Good Weather Prophets

Work Of Beavers Will Indicate Wet Or Dry Years

There will be plenty of rain in 1939, according to the beavers. Beavers in streams near Stanford, Montana, have been observed building new dams and repairing old ones, indicating their expectation of plenty of water.

As weather prophets, beavers are regarded highly. Each winter preceding a drought year, they were observed to have abandoned dams in the lesser streams.

New Type Ice-Breaker

A pumping machine in the shape of a railroad car, travelling on wheels, has been invented in Russia to cut ice. The machine is 6½ feet deep, with a strong jet of water. It is designed to facilitate shipping in the Arctic by aiding icebreakers, which are damaged when they try to smash through ice more than 3.22 feet thick.

Isn't it astonishing how many fellows go to the bad in a vain endeavor to prove themselves good fellows.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: The Health League of Canada, 103 Bond St., Toronto, Ont.

Duty Of A Newspaper

Is To Protest Against Wrong States Vancouver Editor

W. L. MacTavish, editor of the Vancouver Daily Province, told the annual convention of the Canadian Weekly Newspaper Association that it was the business of editors to see there was no shadow of truth in the radical's sneer at the "capitalistic press."

MacTavish said that newspapers upheld capitalism out of the conviction that it was the most satisfactory economic system yet evolved in the present state of the world's progress and added:

"But let it never be said of us that we have lost the power of protest against the abuses of capitalism and have forgotten its weaknesses and costs to the world against its injustice and inequalities."

The struggle of the free press was fought largely for the freedom to speak out the wrongs and woes of the underprivileged, he said.

"Journalism is a profession of protest. It is our calling to search out that which calls for protest in the conditions of our world and to voice that protest on behalf of those who are otherwise voiceless," he said.

Most of the world's progress was due to the successful outcome of the struggle, he said. "The great men of our calling have left us with a heritage in the form of a record of usefulness in the service of humanity."

"I think that perhaps the greatest danger confronting journalism is that in achieving a degree of material success we will lose the crusading spirit which is the hallmark of worthy journalism."

Mr. MacTavish told delegates they could find scope for crusading "in your own town, your own province and your own Dominion."

Newspapers in many countries of the world are not newspapers in the true sense of the word because they do not use such rigid control, MacTavish said.

Chance For Inventors

One Of The Crying Needs Is A Self-Cleaning Stove

The stove is an implement of basic importance. No kitchen is without one. Its uses are manifold. And every time it is used it has to be washed. And every time some one tries to clean an ordinary household stove, that some one is pushed another step toward the madhouse. Is there any task more baffling, more maddening, than that of trying to clean a stove? I think not, says John O'Ren in an article in the Baltimore Sun.

So, while applauding the ingenuity which has brought forth the head rest for bathtub readers, nevertheless I hold back the greater part of my enthusiasm for the person who invents a self-cleaning kitchen stove.

Sound Not Transmitted

Impossible To Hear Northern Lights Opinion Of Scientist

If you see the northern lights some night and think you hear them singing, it may be only the blood rushing through your ears. The Smithsonian Institution said in publishing a report by Dr. A. S. Eve of McGill University that many reputable witnesses have reported the illusion of "hearing" the lights. This is impossible, Dr. Eve added, because the lights occur 60 miles above the earth's surface where there is virtually no air to transmit sound waves. He said the observers might have heard the blood in their heads, the wind whistling through the rigging of their ships, or "the tinkling of the ice of their frozen breaths."

A British scientist says that there are probably only a few thousand gorillas left alive to-day in Africa.

England and Wales have 5,600,000 female workers, according to records.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.M.U. SERVICE

CHAPTER III.—Continued

Sergeant Terry began asking questions.

"You came here on the same train with her, didn't you?"

"Well, I guess I did. If it's the girl I'm thinking of," said Annie.

"She isn't one of your outfit?"

"Mine?" Annie snorted. "No sir!"

"What did she say she was going to do up here?"

Annie bristled.

"Start a little store, of course."

"They all start stores. Or a beauty shop. Or work for somebody," the sergeant replied, in a voice mildly cynical.

"Who are you talking about?" queried Hammond.

"A girl named Jeanne Towers. Been working over at the Cafe de Paris."

"Anything wrong with her?"

Annie stiffened, with a queer air of protective ferocity.

"No, there ain't anything wrong with her. Why don't you let the girl go through? She ain't done nothing to nobody!"

The sergeant laughed.

"Take it easy, Annie," he said. "I am not accusing her. I'm just trying to get a line on her—it's a long way to the Stikine."

"Suppose it is?"

"You wouldn't want me to take somebody go in there that wasn't equipped?"

"What do you mean equipped?"

"Didn't she borrow clothes from you when you got off the train?"

Around the World Annie shot a daggerlike glance at Hammond. His eyes signalled swiftly—that he had told nothing.

"Where'd you get that?" she asked the policeman.

"Oh, some of the men told me—fellows who were standing around."

"A lot of business it is of theirs. Now listen—you can ask these girls. Now listen—you can ask these girls. I never saw the darn girl before in my life. I got to talk to her. She told me she'd lost her pack sack. I had some extra duds. She bought 'em and paid me for 'em. Anything wrong with that?"

"Nothing at all," he said. "I just wanted to be sure the girl wasn't taking chances."

He rose then and stooped through the entrance. Hammond started from the above, halting momentarily at the look in around the World Annie's eyes. Signalled, he moved close to her.

"Listen, the poor little dame's down on her luck," she whispered. "I don't know what about. Get her through."

"Coming, Jack?" called the sergeant from outside. In answer, Hammond moved through the crackling flap and joined the mounted policeman. They went on, along an icy trail.

"What's this girl's name again?" Hammond asked.

"Jeanne Towers—I think it's assumed."

"Why?"

"Oh—she's figured with thick mittens; an unspoken explanation of police intuition. Then, 'Know her?'"

"I think so. Nice-looking girl. Sort of chestnut hair; hazel-brown eyes. If I remember right—"

"Trim built—that's the one. Too intelligent looking to be working as a husher."

"Oh, yes, you mentioned the Cafe de Paris."

"I'm still not satisfied about her. Somebody told me she'd begged this clothing."

"No," lied Hammond, for no reason that he could find. "She bought it. I happened to be there; I saw some money change hands."

They walked on through the dusk, broken by the assorted howling of a thousand dogs.

"It's not that I want to turn anybody back," the sergeant said. "But, damnit, these fool girls get into some kind of a jam and think they can find a way out in a gold rush. It's the end of a lot of them."

At last they were in the sergeant's tent. Lights had appeared now, gleaming dully through the glazed abodes and outlining the dogs, heads up, necks extended, as they shrieked their greetings to the early night.

"To-morrow this'll all be gone," the policeman mused. "And another town growing up in its place."

"Yes," said Hammond.

"Yeah, gold! I've seen it a hundred times. Following the rainbow."

"I've done it enough," answered Hammond seriously. "But this time—"

"No, I know." Again he was silent. The camp was a living picture now, shadows moving about in the tents, busy at the stuffing of pack sacks, restringing of snowshoes, the last repair of dog harness. Look at 'em—all of 'em going to stake out a million, or make it off of somebody else who has staked it out—"

Suddenly he shifted, and paving into a pocket, pulled out his pipe. "Hammond, I'll be busy to-night cycling off some turnbikes. About a dozen of them—a few thimbles, a few things women who weren't smart enough to have a good alibi."

"All right. What's my job?"

"I can't go to the station to meet the night train. This girl, Towers, says she's got supplies coming in. If not—see what you can do about talking her out of going up in that country. She looks like a nice kid."

Hammond pulled on his parka.

"I'll check up on it," he said.

But he looked vainly for her, as the train rumbled in, discharging its cargoes of dogs, snowshoes, packs, workers, boxes and cartons of supplies and baskets of bread. At last Hammond started back to his tent.

The night had cleared. Stars were out. From the east and west, great, feathered shafts of multi-colored Northern lights shot across the sky in eccentric breaks of illumination. At last Hammond halted. Once before, he thought he had heard the crunch of moccasins on the icy trail. With an impulse, Hammond began to back track. Then he stopped.

"Why have you been following me?" he asked.

Clear, Towers spoke slowly.

"I wasn't expect following you."

"You stopped when I stopped."

"Yes, I did."

"Why?"

"Well—I wanted to talk to you. I walked behind you all the way down to the station."

Hammond laughed.

"That's funny. I was looking for you down there. Sergeant Terry asked me to find out about your supplies."

The girl looked up at the gleaming, iridescent sky. She seemed struggling for words that would not come. At last she said bleakly:

"I might as well tell you. I didn't have any supplies coming in."

"Did you follow me to tell me that?"

"No—I was just taking a chance. That you'd help me."

"Help you?" Suddenly he said with sympathetic brusqueness, "Why don't you help yourself. Go back home."

She shook her head. "I can't."

There was a pause. Then, "Does Mr. Barstow know that you came up here?" Her slight exclamation and quickly turned face formed the only answer. "Remember?" Hammond asked. "I met you on the stairs; going up to his office."

The girl raised a mittened hand, rubbing at the fur which shielded her throat.

"I—I remember." Then quickly, "He didn't talk to me about me."

Down at the station, the train finished the unloading of its cargo, hu-

French Woman Arranges Flowers For Royal Visitors To Paris

Madame Charliat, who has been in charge of floral decorations for all royal visitors to Paris since the early nineties, is a bright, vivacious little woman full of Gaelic wit, with a stupendous knowledge of flowers and a flair for arranging them. She was entrusted with all the floral decorations of the Palais de l'Elysee for the recent visit of King George and Queen Elizabeth, writes Noel Thompson in the London Daily Sketch.

Although it was the first time that 300 guests were seated at the great horseshoe table in the Salle des Fêtes, Madame Charliat was not overwhelmed by the task of decorating it. She has done so for over 30 years, under more Presidents than I could tell you without referring to a history book.

All the time she talked she was making garlands of deep red roses to cover crown-shaped baskets that were placed at intervals down the great table. There were 7,000 blooms. Between the crowns, which had deep red roses climbing up the sides and clusters of pink ones at the top, there were a massed carpet of red roses, trails of which adorned the table between exquisite little 18th-century Sevres dancers.

Besides the Sevres figures there were lovely crystal bowls, by Lalique, filled with pink roses. The head of the table, where their Majesties sat with the President and Mme. Lebrun, orchids were mingled with the roses.

Dinner was served on Sevres plates of deep blue with gold stars. The head of the table, where their Majesties were seated, was decorated with every known type of bird in lovely coloring.

Beyond The Century

One Man Reached Age Of 113 According To Scientific Tests

A French-Canadian who died early in the 19th century lived longer than any other person whose claims have been submitted to scientific tests, Dr. Maurice Ernest, biologist and expert on the subject of old age, said in a letter to the London Times.

The letter was inspired by the announcement of Sir John Hall, secretary to the Anti-Slavery and Aborigines Protection Society, of the discovery in Buchanaland of a native believed to be at least 140 years old. Dr. Ernest and other members of the Centenarian Club, which he headed, investigated the means whereby health and vigor may be retained beyond the century, offered to reimburse Sir John to the sum of £200 (£1,250) for the expense of bringing the native to London if his investigation should show the man to be over 120 years old.

"I have spent years," the letter continued, "examining the claims of alleged super-centenarians past and present, and in summarizing the result of my labors I have shown, in the opening chapter of my book, 'The Longer Life', that the extreme life span of man to date is only just over 113 years, an age achieved by one Pierre Joubert, a French-Canadian who died early in the 19th century."

Has Been Banner Year

Gideon Society Distributed 81,000 Bibles In Last Twelve Months

During the past 12 months a casual reader of the news might conclude that the harsh voices of materialism echoed a world rushing headlong to its doom; rushing away from the spiritual sanctuaries of unselfish love. The world's clamor is strident. At times it may seem to drown the "still, small voice" of spiritual inspiration. Yet the past year, despite all its stridency, records distribution by the Gideon Society of 81,000 Bibles. This is a substantial increase. The yearly average over the last 30 years has been only 50,000. The Bibles have been placed beside hospital cots, in hotel rooms, in employment agencies, on school desks, in prison cells. The very materialism of the age, showing itself in pagan practices and a brazen disregard of human rights, is driving men and women to seek refuge. Millions seek it in temporary shelters. Other millions are turning to the Bible in the recognition of no terror, cruelty of time, and no dull load of unemployment or despair, but can be lightened and even healed by recourse to the practice of Bible truths.—Christian Science Monitor.

The chemical industry is practically depression proof, according to one chemist, because it is continually pioneering into new industrial lines.

Jones—Have you ever noticed how a woman always lowers her voice when she asks a favor?

Whitey—Yes, and raises it when she doesn't get it.

The Mechanized Farm

Makes Things Better If Idea Is Extended To Home

The Lethbridge Herald says R. J. Deachman, M.P., who has been travelling through the West, learned from a prominent Manitoba farmer that it is easier to get a good hired man when the farm is fully mechanized.

The old-fashioned hired man, Deachman is satisfied, is as dead as a liver stable. In his place is the mechanic, who will spend the wet days on the farm tinkering with an engine or trying to produce something which reduces the sum total of human effort necessary to effect a purpose. But the hired man is not the only one who wants a mechanized farm—the farmer's wife wants it—so does the daughter—the home must be mechanized.

All this is understandable. There will be more contentment on the farm when there are more mechanical devices there to ease the life of the farmer and his wife. When the washing can be done by electrical devices, as it is in the city, the farmer's wife will not feel that she is a drudge, and be envious of the women in the city. The mechanized farm home is coming; in some parts of the continent it has already arrived.

Salt Shortage

Spanish War Causes A Difficult Situation In Newfoundland

Refusal of Spanish Insurgent General Franco to allow a Russian steamship to enter the port of Cadiz has caused a difficult situation among Newfoundland fishermen.

The ship was chartered to bring more than 30,000 hogsheads of salt to St. John. Delay in bringing the salt added to the difficulties of the fishermen, already troubled with a shortage while codfish were reported in abundance along the Newfoundland and Labrador coasts.

The insurgents refused to allow the ships to enter port on the grounds she had carried war materials to the Government forces. A ship of British registry was engaged to carry the salt.

Butter Production Up

Saskatchewan Output For July Sets Record For Single Month

Saskatchewan produced 4,509,703 pounds of creamy butter in July, a new record for any single month and an increase of 317,201 pounds over the July production last year, or 7.5 per cent. The previous high month was in June, this year, when the production was 4,328,346 pounds. Two-thirds of the big increase was from the central zone, though even the south showed a small increase.

Airmail in Britain last year weighed 50 times that of the service's first year in 1923.

Butter has just replaced margarine on the sailors' bread in the British Navy.

New Respirator Mask

Aviation Equipment Designed By Mayo Scientists Is Success

Mayo clinic scientists said a new type of respirator mask, tried out in planes flying in the stratosphere, may some day serve as a substitute for oxygen tents now used in hospitals.

Dropping out of the sky after a non-stop flight from California, an airplane landed at Minneapolis with scientific data on oxygen mask equipment expected to make an important contribution to medical science.

For seven hours and 40 minutes the large transport plane of Northwest Airlines had flown from Los Angeles and approximately one-third of the time at an altitude of 31,000 feet in order to give the crew time to test the new masks.

Dr. W. R. Lovelace, Rochester, Minn., Mayo Foundation fellow and co-designer of the mask, said he was well pleased with the success of the tests.

Sure To Hold

Alliance Between France And England Has Sound Foundation

One point, reliable as the North Star, stands fixed among the fluctuating currents of European policy, and it is this point of stability that is stressed and sealed by the visit to France of the King and Queen of England. The pageantry Paris puts on to welcome the Royal visitors may be less splendid and spectacular than the imperial parade that Rome prepared for Hitler. It has less need to be. France does not have to exaggerate its strength and grandeur to impress the British sovereigns or to conceal such doubts and questions as lurk behind the embazoned axis linking Rome and Berlin. Whatever happens, regardless of any conceivable shift of circumstance or any possible combination of other powers the Franco-British entente is the one alliance sure to hold.—New York Times.

Sounds Like Tall Story

Negro residents of Mount Bayou, Miss., claimed the title of "the world's strongest baby" for four-year-old Sam Mitchell, Jr., who they describe as a second Joe Louis. The child carries a 24-pound sack of flour or two 10-pound gallon buckets of molasses with equal ease.

Local News

Mr. and Mrs. Harold Turner and Helen, Mr. and Mrs. Wm. Martland and family and Mr. and Mrs. Tom Rose are on vacation at the Pacific coast.

Mrs. Harry Mosher and daughter Evelyn, of Lethbridge, were the guests of the Misses Margaret and Ethel Dunlop during the week-end.

Ivor Morgan, who has been having practical experience at the Diesel Engineering school at Vancouver for the past two months returned home on Friday.

Mrs. D. Davies and daughters, accompanied by Mr. Storey, returned from Arrow Lakes last week and spent a few days the guests of Mr. and Mrs. Fred Cox before returning to their home at Edmonton.

A party of young Coleman people including the Misses Alwyn McLeod, Mae Bell, Muriel Naylor, Margaret McLeod and Margery Halliwell and Messrs A. W. Kennedy, R. Pattinson, R. Jones, Tom McGovern and J. Tompkins motored to Waterton Lakes on Saturday evening.

Mr. and Mrs. Wm. Chapman junior, of Los Angeles, left today for their home after visiting here two weeks with the former's parents. They were accompanied by Mr. and Mrs. Wm. Chapman senior who will travel with them as far as Portland later travelling to Vancouver where they will spend a vacation.

ANNOUNCEMENT

Mr. and Mrs. David Hoyle announce the engagement of their eldest daughter, Kathleen Alice, to Mr. Leslie G. S. Barrows, youngest son of Mr. and Mrs. George Barrows, of Milk River, the wedding to take place the middle of September.

Current Comment on Sports Activities

COLEMAN PLAYERS TO COMPETE AT LETHBRIDGE TENNIS TOURNAMENT

Dick Shone, George Jenkins and Frank Shum will represent Coleman at the southern Alberta tennis tournament at Lethbridge on September 3, 4 and 5.

Players from Calgary and all southern Alberta are expected to be present. Lethbridge has been awarded the provincial net tournament for next year and officials will likely endeavor to get as large an entry as possible in order to gain experience for the provincial tournament.

The southern Alberta mixed doubles title is held by Margaret McLeod and Bill Balloch, while the men's doubles is held by Balloch and Roughhead.

Roughhead is expected to represent the local club at Trail in September, when the Kootenay championships are decided. It is at this tournament players from across the border compete. A Spokane player is the present champion.

HOLDITCH WISHES TO COME TO COLEMAN

"Bud" Holditch, one of Calgary's best hockey players, is anxious to come to Coleman and help Canadians win an Alberta senior title.

Holditch was a player Coleman was anxious to secure several seasons ago, McBurney and Rippon spending some time in a vain effort to secure his services. He is at present at Oids, but due to the hall having done much damage to the wheat fields, he is of the opinion that even if Oids do let a team it is doubtful if they will cut a wide swath in the league. At the present time no steps have been taken to bring this player to Coleman.

TIME MARCHES ON

Times change! In previous years it has been the experience of local senior hockey executives to pursue good players and offer them everything up to the moon if they would consent to do their puck chasing for Coleman. This year it is entirely the reverse.

Coleman Honors Valued Citizens

(Continued from Page 1)

known as Sentinel Motors, he engaged in conveyancing and insurance; also he was district coroner for many years. Oil development under the firm name of Inland Petroleum Limited also was included in his business activities, and he still retains the presidency of the company which was organized in 1930 or 1931. In earlier years he was postmaster here.

In 1932 he was head of the Citizens' League, at a time when The Pass towns were in the throes of a struggle between the forces of extreme radicalism and those who favored more moderate policies in dealing with labor disputes. His services were given unselfishly in helping to bring about a settlement of a bitter labor struggle.

After 33 years of active life, both in business and social affairs, Mr. Morrison has decided to retire to the Pacific coast. Mrs. Morrison, who was married here in 1905, after being on the public schools staff, has been a valuable helpmeet in her husband's activities.

At a meeting of business men in the town hall on Friday evening, Howard C. McBurney acted as chairman, and complimentary addresses were given by Mayor George Pattinson and Mr. George Kellock, general manager of McGillivray Creek Coal & Coke Co., Limited.

Later in the evening members of Summit Lodge tendered a complimentary banquet to Mr. Morrison, together with Mr. Fraser McLeod, master mechanic at International mine, who is resigning at the end of the month to resume service as boiler inspector under the provincial government.

FAREWELL TO MR. AND MRS. FRASER McLEOD

A well-known and highly respected Coleman family, who will shortly leave here to live in Calgary, Mr. and Mrs. Fraser McLeod and children, carry with them good wishes of the community.

About two years ago Mr. McLeod took over the position of master mechanic at International Coal & Coke Co., Ltd., after having been for some years provincial boiler inspector. He had lived in Coleman some years prior to that, so that he was no stranger to town, his parents, Mr. and Mrs. Andrew W. H. McLeod, being among the old-time residents of Coleman.

He took a keen interest in Masonic circles, and at the present time occupies an office in the lodge. At an emergent meeting on Friday evening in the lodge room, he, in company with Alex. Morrison, was a guest of honor, when souvenirs were presented and complimentary addresses given by officers and members.

The younger members of the family were popular and made many friends by their genial dispositions. All join in wishing them "good luck" in their new home.

Letters have been received from hockey players all over Western Canada asking for places on the team. Holditch is a good example. Two years ago Coleman chased after him. Today he phones the executive on his own accord asking to be considered for the team.

Coleman's excellent showing against Trail last year has a large part to do with this agreeable change. Coleman is the only team in Canada that did not take a back seat to the famous Allan Cup sextet, trimming Trail two games in four.

Douglas Norris, of Trail, has been sent a registration card on which to place his "John Henry" and return to the Trail team. Norris did not play last year, due to sickness. He last played for Prince Albert and was also at a Calgary hockey school, where he was watched by some members of the local executive who report him a host-class defenseman. Elmer Koper, Trail coach, was responsible for taking him to Trail.

A souvenir photograph of East Fife, Scottish cup winners of last season, now adorns the wall of the Grand Union. In winning the famous trophy, the Mchall team is reputed to have made \$10,000 (\$50,000) in cash and much more in friends throughout the world. Underneath the picture are the autographs of all the players.

"Social Credit Democracy Day Rally at Macleod Farms 350—Hartley and Blackmore Speakers—Ask People to Hang On," states a headline in the Lethbridge Herald. Behind one of the men who got a tiger by the tail, he simply had to hang on or be devoured.
